

Institut Français de Recherche pour l'Exploitation de la Mer, 1400 people, in France and Overseas, we recruit for the Department of Deep-Sea Ecosystem Studies of our "Deep Environment" Laboratory in Brest :

Experienced researcher in marine ecology m/f

Tenure track position.

You interact with our interdisciplinary group and establish and maintain innovative research programs on benthic deep-sea biodiversity in the framework of national and international programs.

You are an outstanding scientist with interest to join an interdisciplinary group working on deep-sea benthic ecology. You must have a strong scientific background, PhD and post-doc experience, and be able to demonstrate an excellent track record of independent research in marine ecology or biological oceanography including high-quality peer-reviewed publications. Moreover, you should have specific skills in modern and classical taxonomy, biodiversity theory and biostatistics. Good working knowledge of English as well as Fluent French language is desirable (otherwise, successful intensive training course in French would be required during the first six months).

Beginning : spring 2006.

Please send your application (letter with statement of current and future research, Curriculum, financial expectations) under the reference 05-058N to: Ifremer - Brest Centre - Human Resources Department - BP 70 - 29280 Plouzané - France.

Applications deadline : until January 31st, 2006.
